Discover a smarter way to furnish your office.

# re:work turns sustainable values into action...

re:work exists to drive circular and more sustainable ways of purchasing and procuring furniture. We do this to...:

## Eliminate Waste

Using science, technology, and engineering, we want to raise the perceived value of preowned products, so that they are held in higher regard than their new counterparts. We want recycling to be a last resort and eliminate furniture of any condition being sent to landfill.

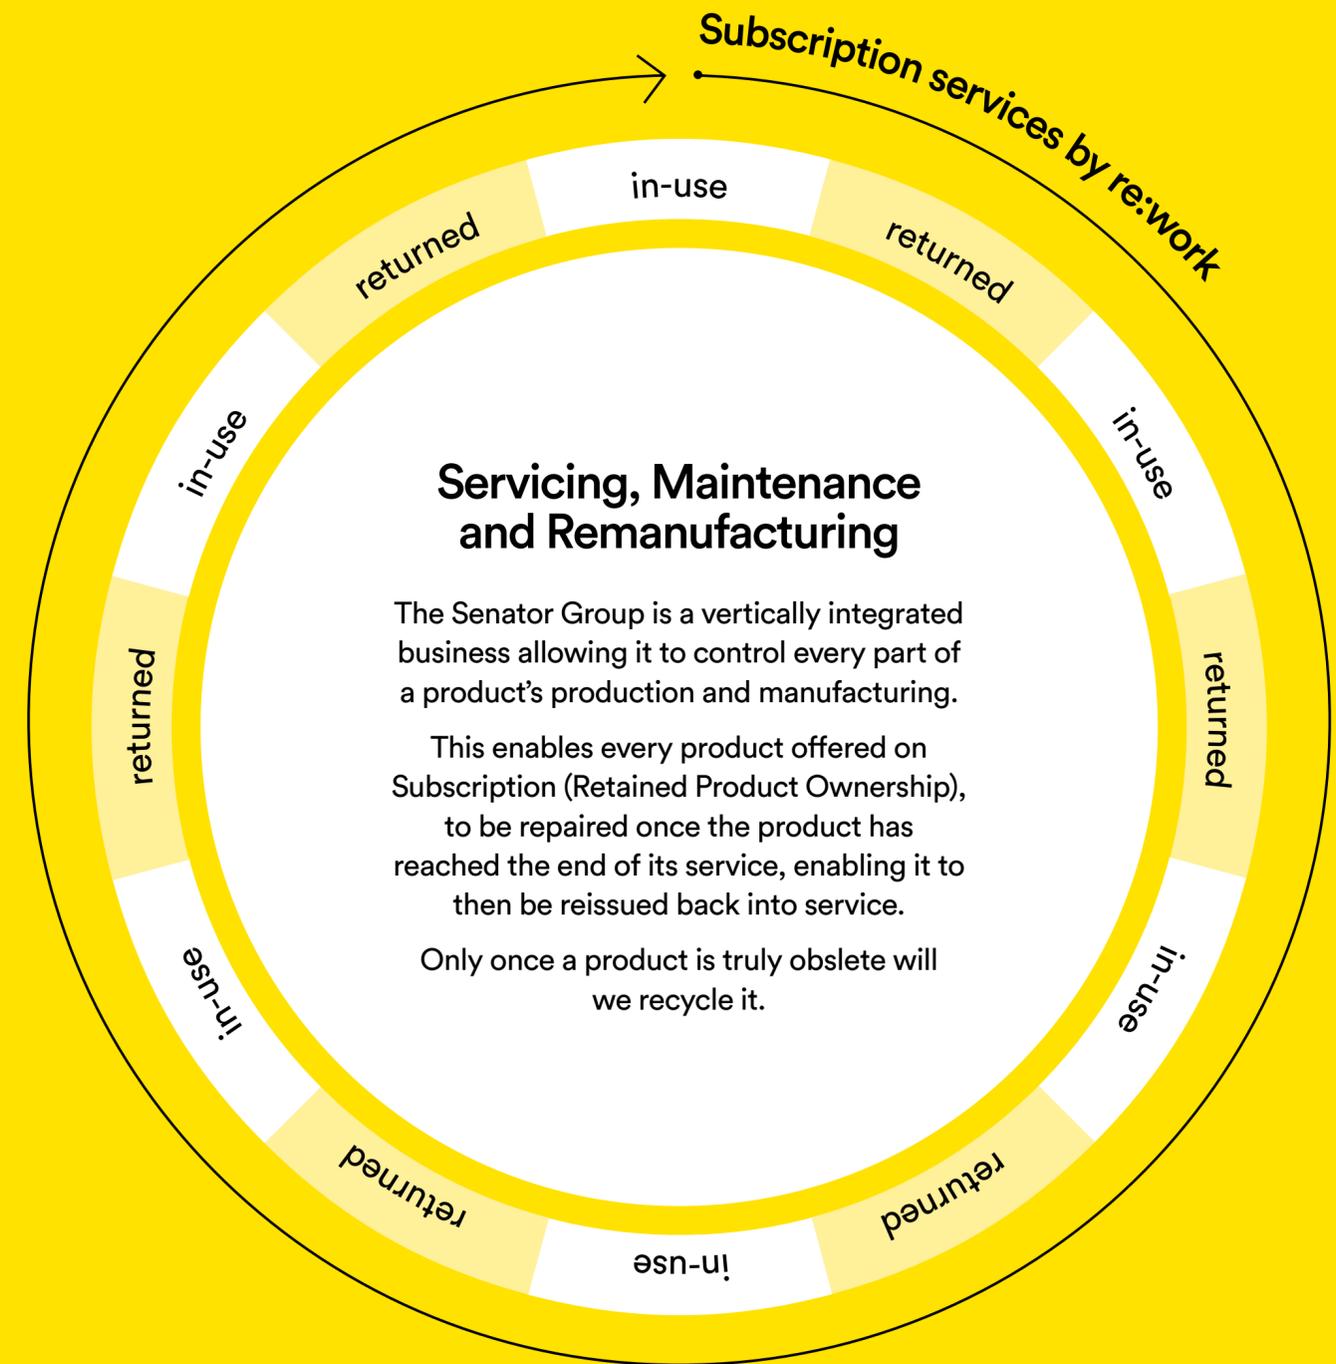

## Lead Change

We will lead the furniture industry in embracing a circular economy. We will place ethics and the environment above all, to provide a choice of sustainable solutions with reduced carbon and resource impacts to businesses.

## Environmental Responsibility

Our values are inherited from The Senator Group's pledge to protect people and planet for nearly 50 years. In the spirit of consuming less, we will share the Group's resources, along with bringing together people who care deeply about climate change. With customer and quality at our heart, we will grow on this journey with our clients, supporting their needs and sustainability goals.
