Axyl

Design – Benjamin Hubert | Layer

Axyl is a seating collection offering a sophisticated combination of recognizable elements. Comprising of an arm chair and stool, Axyl utilizes a strong geometric design language that is entirely original yet draws on familiar references to create a range of highly functional seating.

Axyl - Bistro Dining Tables

Design – Layer

Axyl tables follow the same design typology and constructional values as the rest of the Axyl collection, featuring a shared distinct frame. A table for every occasion, Axyl café & bistro tables are perfect for smaller gatherings while the dining tables suit larger groups and more formal settings.

Axyl tables are exceptionally robust for continued use in high impact dining areas. The use of a solid Steel stem on the café range, greatly enhances the stability of the table while minimizing the need for a large frame base.

Summary of Grain Depth and Structure for Premium Woodgrains TFLs

Premium Woodgrains TFLs are part of Egger's Feelwood range, characterised by a deeper and more pronounced grain structure compared to standard TFLs. To manage this depth and prevent damage to the decorative paper, Feelwood decors incorporate additional barrier layers. This construction enhances impact resistance, bending strength, and durability.

What makes the Feelwood Premium Woodgrains TFL different?

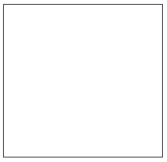

The deeper texture in Feelwood decors is synchronised with the visual pattern, creating a highly realistic wood effect. This design also results in a slight thickness increase of approximately 0.6". These features distinguish Feelwood products from standard TFLs, offering superior durability and enhanced aesthetic appeal as a unique selling point. Due to the more pronounced grain structure, Premium Woodgrains TFLs may not be ideal where a smoother finish is equired. Samples can be ordered through our GroupPortal or by contacting customer service.
