Elegance, poise and comfort were the words that guided the development of the Phoulds seating range. The development calls for the meticulous joining of two pressed plywood shells to create the chair’s structure. The seat structure is then lined with a distinctive six panel upholstery style that provides the user with sumptuous levels of comfort. In addition the outer shell can be fully upholstered as an option. The range offers the diversity of both high and mid back shells and two distinctive support frames. The style of the chair makes a strong visual statement whilst its fine detailing and traditional material selection make it an excellent choice across workplace hospitality and retail environments.

Design by Allermuir

Our team of talented in house designers are responsible for creating elegant, innovative furniture designs which not only look beautiful, but minimise the impact on the world around us.
